

# A Powerful Ultrasound System for Breast Imaging

Introducing the SuperSonic™ MACH 30 Ultrasound Imaging Platform

SuperSonic™ Mach 30 system also known as Aixplorer Mach® 30 system.

**Indications for Use:** The SuperSonic Imagine Aixplorer MACH® range ultrasound diagnostic systems and transducers are intended for general purpose pulse echo ultrasound imaging, soft tissue viscoelasticity imaging and Doppler fluid flow analysis of the human body. The Aixplorer MACH® ultrasound diagnostic systems are indicated for use in the following applications, for imaging and measurement of anatomical structures: Abdominal, Small Organs, Musculoskeletal, Superficial Musculoskeletal, Vascular, Peripheral Vascular, Intraoperative, OB-GYN, Pelvic, Pediatric, Transrectal, Transvaginal, Urology, Neonatal/Adult Cephalic and Non-invasive Cardiac. It is intended for use by licensed personnel

# SuperSonic MACH 30

Addressing your expectations with UltraFast™ innovations

**SuperSonic MACH 30 ultrasound system** - powered by the next generation of UltraFast™ imaging - leverages 10 years of clinical expertise to help you handle **routine to comprehensive** breast exams with ease and confidence.

By analyzing your exam workflow, SuperSonic MACH 30 was designed to **maximize comfort and drive efficiency** in a busy practice thanks to its ease of use and streamlined ergonomics.

The **exceptional image quality** of the SuperSonic MACH 30 combined with access to **advanced capabilities** delivers the level of premium performance you expect and patients deserve.

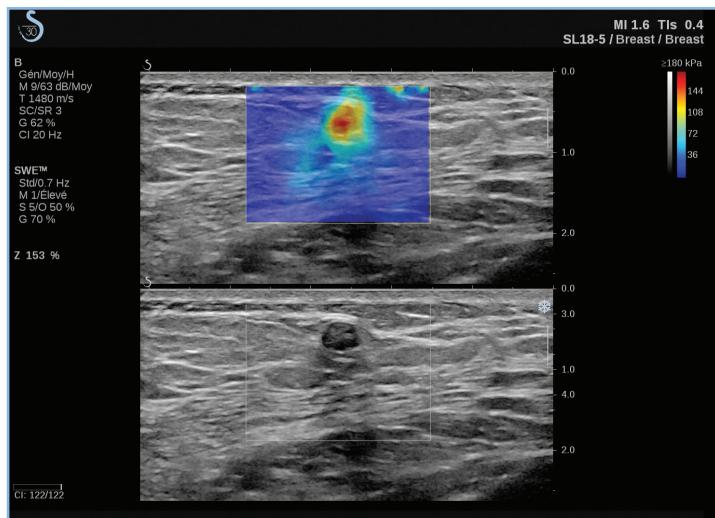

# Value Based Innovations in Breast Imaging

Experience evidence-based outcomes and improving the patient experience

Over the years, SuperSonic Imagine introduced several innovative imaging modes — made possible by its UltraFast™ technology. These innovations integrate with routine workflow, to deliver added value into breast imaging and improve patient management.

## ShearWave™ PLUS

ShearWave Elastography (SWE) from SuperSonic Imagine is the only technique capable of visualizing, analyzing and quantifying the tissue stiffness in real-time, on all transducers. This non-invasive approach remains reliable and highly reproducible in 2D and 3D.

### Key attributes:

- Large region of interest SWE PLUS
- Increased SWE PLUS frame rates
- Accelerated filling of the SWE PLUS box
- Increased penetration to visualize deep lesions
- Preserving the quality of the B-mode

### REAL-TIME SHEARWAVE™ ELASTOGRAPHY

SuperSonic Imagine's proprietary shear wave-based elastography technology is the most clinically studied elastography in its category. With over 150 publications in peer-reviewed medical journals, SWE has been proven to be a complementary tool for:

- Breast lesion diagnosis and characterization<sup>1</sup>
- Biopsy planning<sup>2</sup> and treatment
- Therapy monitoring<sup>3</sup> and prognostics

# Pushing the Boundaries of Breast Imaging

## Image quality and innovative modes for diagnostic confidence

The innovative transducer designs and powerful capabilities of software-based architecture are optimizing signal-to-noise ratio at each step of signal processing.

**SonicPure**, excellent B-mode image quality with incredible definition in both fundamental and harmonic imaging modes.

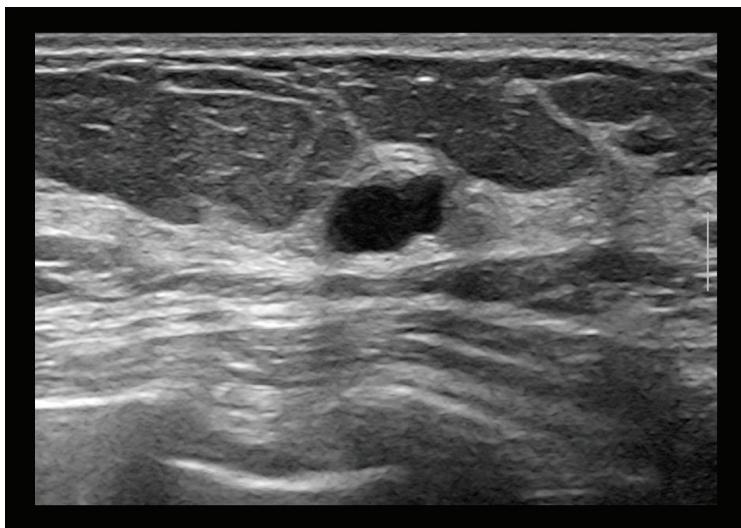

- Optimized penetration settings to visualize structures at variable depths and in dense breasts
- SuperCompound: fast compounding for smoother images with reduced speckle
- SuperRes: enhanced delineation of structures to improve lesion conspicuity
- TissueTuner: clear images obtained by matching the speed of sound to tissue density
- AutoTGC: automatic optimization of the gain for the entire image

### ULTRAFAST™ IMAGING

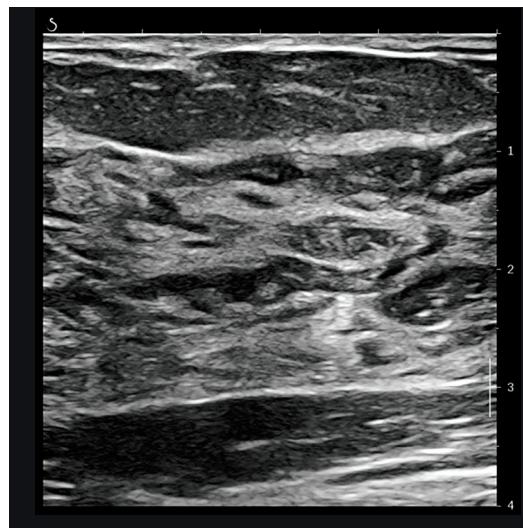

The UltraFast™ technology — first introduced on Aixplorer® in 2009 — allows for the capture of images 200 times faster than conventional ultrasound.

In addition to obtaining genuine diagnostic B-mode information, this unmatched technology has led to several breakthroughs that offer new possibilities for patient management: real-time elastography ShearWave™ PLUS, TriVu™ technology, Angio PLUS and Needle PLUS.

The next generation of the UltraFast™ technology — introduced on SuperSonic MACH 30 — has 5x more computing power\*.

**SonicPure: Excellent lesion conspicuity**

**SonicPure: Exceptional tissue differentiation**

\*In comparison with previous Aixplorer® products.
