

An In-House fFN Analyzer Can Help Better Realize Financial & Patient-Care Benefits

An in-house analyzer for fFN testing allows your lab to...

- ✓ Save money on courier fees
- ✓ Save time on logistics related to specimen transport
- ✓ Avoid potential mark-ups or hidden fees from external labs
- ✓ Provide faster turnaround-times with results in <1 hour¹

Rapid fFN TLI_{IQ} analyzer¹...

- ✓ Minimal operator time (<60 seconds per test)
- ✓ Printed test result for documentation
- ✓ Minimal footprint (~7" x 8")
- ✓ Easy QC

Walk-away Instrumentation

Total operator time is less than 60 seconds per test.¹

1 Run the TLI_{IQ}® QCette® once a day.

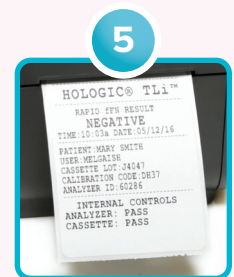

2 Enter the patient information

3 Dispense specimen into the Rapid fFN® Cassette well

4 Press Enter and walk away.

5 Results ready in less than 30 minutes

fFN Testing Can Help Reduce Unnecessary Admissions & Transfers

Facilities that use a standardized preterm labour protocol, including in-hospital testing for fFN, have realized significant reductions in unnecessary admissions and unnecessary transfers, as well as better patient outcomes.^{2,3}

fFN testing can help rule out ~80% of patients with symptoms of preterm labour.⁴

~ **80% Patients**
receive a negative result

~ **20% Patients**
receive a positive result

Benefits of a Negative Result

A negative fFN result means the patient has a **<1% chance of delivery in the next 14 days.**

Helps avoid unnecessary:

- Admissions
- Transfers
- Interventions

Benefits of a Positive Result

A positive result can help a physician decide whether a patient and her baby may benefit from interventions such as:

- Antenatal Steroids
- Magnesium Sulfate
- Admission or Transfer
