# HOLOGIC®

A single **purpose.**

A common **passion.**

A lifelong **promise.**

Enabling healthier lives everywhere, every day

Breast & Skeletal Health | **U.S. Product Catalog 2023**

The Science of **Sure.**

Purpose, passion and promise are the drivers behind everything we do.

We call our approach The Science of Sure. It reflects who we are as a global champion of women's health, helping to improve and save lives through early detection and treatment.

With groundbreaking technology at the core, our innovations are designed to help caregivers achieve exceptional clinical results, making it possible to identify symptoms early, diagnose disease with greater certainty, and treat patients with compassion.

By committing firmly to early and accurate results, we're addressing not only patients' need for certainty, but importantly, their comfort and dignity.

Because when their health is in question, **nothing is more important than being sure.**

SCREENING

Hologic mammography systems offer the Genius® exam.

3Dimensions™ Mammography System

The 3Dimensions system is designed to provide higher-quality 3D™ images for radiologists, a more comfortable mammogram for patients, and enhanced workflow for technologists.

Product Codes: 3DM-SYS-STD, 3DM-SYS-STD-MOB, 3DM-SYS-STD-NS

Ergonomic upgrade kit including biometric login, powered memory height adjustment, and barcode scanner.

Product Code: 3DM-KIT-ERGO-XRAY

SCREENING

Hologic mammography systems offer the Genius® exam.

Selenia® Dimensions® 3D Mammography™ System

The first commercially available system to deliver on the extraordinary promise of breast tomosynthesis.

- 2D configuration can be ordered for a 6000 or 3000 system.
- A mobile option is available at time of original system purchase only.

Product Codes: SDA-SYS-3000-3D, SDA-SYS-3000-3D-UPS, SDM-SYS-3000, SDM-SYS-6000-3D, SDM-SYS-6000-2D

Selenia Dimensions 3D Mammography Option:
Adds Genius 3D Mammography capability to an installed Selenia Dimensions 2D system. (Additional hardware may be needed.)

Product Code: ASY-03158

Options:
- X-ray exposure foot switch
- Biometric login (6000 only)
- Barcode reader
- 2MP or 3MP monitor

Hologic Clarity HD+ Technology

Hologic Clarity HD+ technology includes three licenses:
Hologic Clarity HD®, Intelligent 2D™ and 3DQuorum® technology.*

* FDA Approvals P080003/S006, P080003/S008 and EU Tech File: TFL-00059

The Hologic Clarity HD imaging technology package provides 70-micron high-resolution 3D™ data that provides sharper 1mm tomosynthesis images, revealing more detail. It enables more natural-looking Intelligent 2D synthesized images and workflow advantages with 3DQuorum technology.

- Intelligent 2D technology helps you achieve higher levels of accuracy compared with 2D mammography for all breast types at a dose comparable to the U.S. average mammogram.
- 3DQuorum technology produces 6mm SmartSlices designed to expedite reading time by reducing the number of images to review, with no compromise in image quality, sensitivity or accuracy.

Product Codes: DIM-LIC-CHDPLUS, DIM-LIC-CHDPLUS-UP
Hologic Clarity HD+ Technology

Hologic Clarity HD High-Resolution 3D™ Imaging:

Hologic Clarity HD high-resolution 3D™ technology comes standard with all 3Dimensions systems. This technology features a high-resolution detector and an advanced imaging algorithm that work together to deliver exceptional 3D™ images - regardless of breast size or density.

Product Code: DIM-LIC-CHD

Low Dose High-Resolution 3D Mammography™ with Intelligent 2D Imaging Technology:

Raise breast cancer screening performance, while minimizing patient radiation dose and discomfort.

Product Codes: DIM-LIC-I2D, DIM-LIC-I2D-UP

3DQuorum Technology:

3DQuorum technology utilizes Genius AI™ powered analytics to uniquely reconstruct high-resolution 3D™ data from Hologic Clarity HD images.

Product Codes: DIM-LIC-3DQ, DIM-LIC-3DQ-UP, DIM-LIC-I2D3DQ, DIM-LIC-I2D3DQ-UP

SCREENING

Image Analytics

Genius AI® Detection Software

Using deep learning technology, Genius AI Detection software finds cancers with better accuracy than Hologic's previous generation CAD, with the software fully integrated on the Dimensions® AWS. Genius AI Detection technology identifies areas of interest on standard or Hologic Clarity HD high-resolution images and 3DQuorum SmartSlices.

Product Codes: DIM-LIC-GDT, DIM-LIC-GDT-IC, DIM-LIC-GDT-UP, DIM-LIC-GDT-IC-UP

ImageChecker® CAD Software

ImageChecker CAD software provides proven performance and continues to be a leading CAD technology. The software analyzes conventional 2D, C-View™ and Intelligent 2D™ synthesized images derived from tomosynthesis datasets.

Product Codes: DIM-LIC-IC
           For a Cenova™ server- R2LIC-2111
           Cenova 2D Tower System- R2SYS-2200
           Cenova 1U System- R2SYS-2200-1U
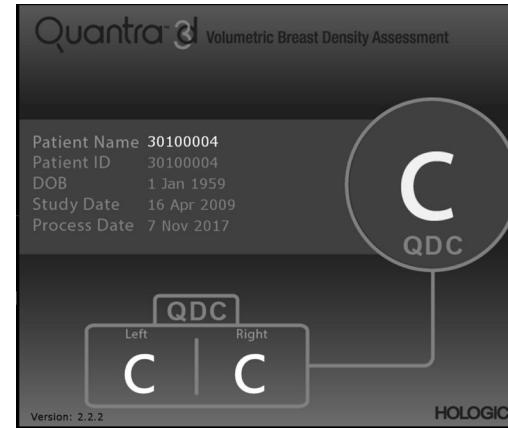

Quantra® 2.2 Breast Density Assessment Software

Higher breast density is known to increase a woman's risk for breast cancer. Quantra 2.2 breast density assessment software enables you to assess breast density quickly and accurately in all patients, helping to standardize reporting, adjunctive screening and ultimately, elevate the level of care across your entire practice.

Product Codes: DIM-LIC-QT
           For a Cenova™ server- R2LIC-2103-V2.2
           One Cenova server can support four Quantra or
           ImageChecker CAD licenses.

Additional Dimensions Products and Licenses
I-View® 2.0 Contrast Enhanced Mammography Software

Create comprehensive diagnostic studies that reveal exceptional clinical detail and sensitivity with Contrast Enhanced 2D imaging (CEM).

Product Codes: DIM-LIC-IVIEW, DIM-LIC-IVIEW-UP

In combination with Affirm® Contrast Biopsy software:

Product Codes: DIM-LIC-IVIEW-ACB, DIM-LIC-IVIEW-ACB-UP

Low Dose 3D Mammography™ with C-View™ Software

Raise breast cancer screening performance, while minimizing patient radiation dose and discomfort.

Product Code: SDM-LIC-0005

Advanced Workflow Manager for Dimensions Systems

Workflow acceleration tool designed to streamline data communications between multiple Dimensions systems, giving staff the ultimate flexibility in patient management. Available in tower or rack mount configurations.

Product Codes: AWM-SYS-0100, AWM-SYS-0101

Dimensions Advanced Connectivity License

Provides MPPS to report the current state of an exam and RDSR capabilities to send dosage to third-party applications.

Product Code: SDM-LIC-0001

Dimensions Notices License

Provides communication between the technologist at the AWS and the radiologist at the SecurView® workstation.

Product Code: SDM-LIC-0002

SCREENING

Patient Comfort

SmartCurve® Breast Stabilization System

The paddles' curved compression surfaces are designed for a more comfortable mammogram. A system license takes the curvature of the paddles into account so that there is no impact on the image quality. The SmartCurve system is included with the 3Dimensions™ system.

SmartCurve 3 Paddle Pack:
Product Code: DIM-ASY-SCS-3PACK, DIM-ASY-SCS-3PACK-UP

SmartCurve Mini Paddle:
Product Code: DIM-ASY-MINI

MammoPad® Breast Cushions:
A hygienic cushioned pad designed to provide a sanitary barrier, a more comfortable mammogram, and improved positioning.

Product Codes: MP301, MP201, MP101

SCREENING

3D Mammography™ System Portfolio Options

Paddle Rack

Protectively store and organize your paddles with space-saving, wall-mounted storage and organization racks. The felt-lined Paddle Rack helps prevent scratching and damage. Each rack, sold separately, provides enough storage room for 3-4 paddles. Includes wall-mounting bracket (installation not included).

Product Code: ASY-04462

Magnification Localization Crosshairs

This device is designed for use when performing needle localization procedures in magnification mode. It is designed to work with all magnification localization paddles (sold separately).

Product Code: ASY-02258

Localization Crosshairs

This device is used to perform accurate needle localization procedures. It is designed to work with all contact localization paddles (sold separately).

Product Codes: ASY-02385 for SDM, ASY-10644 for 3DIM

Phantoms

Flat Field Phantom Block and Case

A clear acrylic block used for gain calibration and image artifact evaluation, with case

Product Code: ASY-01621

Gammex ACR Approved Phantoms

Designed to test image quality and sensitivity using target objects in the phantom to simulate calcifications, fibrous calcifications in ducts, and tumor masses. Simulates the x-ray attenuation of a 4.2cm compressed human breast composed of 50% glandular tissue. Target objects within the phantom range in size, shape and density, similar to those found clinically.

Product Code: PHANTOM-ACR-156

Gammex Case

Compact, lightweight case with shoulder strap with custom foam cutouts to hold each of the Gammex 156 phantom's components to protect them during transport and storage. Outer case black Cordura, inside black nylon with foam lining.

Product Code: PHANTOMCASE-ACR-156

Tomosynthesis Geometry Calibration Phantom

ACR tomosynthesis geometry calibration phantom, no case.

Product Code: ASY-02042

SecurView® Workstation Workflow Solutions

SecurView DX Diagnostic Workstation

SecurView DX Diagnostic workstations are dedicated to breast imaging solutions that offer flexible, interactive and comprehensive diagnostic tools to allow radiologists to see more clearly, work more efficiently, and increase case throughput. Provides optimal viewing and analysis for tomosynthesis data sets. Your account manager will configure an optimal solution to meet your needs.

Product Code: SVDX-01200

SecurView RT Technologist Workstation

The technologist workstation provides access to prior and current images to facilitate optimal positioning and technique selection; exchange of annotations, comments and instructions in seconds, facilitating communication between the physician (at the SecurView DX workstation) and the technologist.

Product Code: SVRT-00300

CONNECTIVITY

Hardware and Software Options

SecurView DX Manager

Provides communication and data sharing between multiple diagnostic workstations, ensuring instant image access throughout the enterprise.

Product Code: SVDX-00600R

SecurView RT Manager

Provides communication and data sharing between multiple technologist workstations, ensuring instant image access throughout the enterprise.

Product Code: SVRT-00600R

Advance MultiView Multimodality

Additional software module for display of breast imaging modalities, specifically MRI. Also includes a high-end graphics card.

Product Code: WS-ACC-1026

Application Synchronization

Allows for synchronization with dictation, RIS and mammography reporting systems.

Product Code: WS-LIC-1005

AIE Image Processing Option

Allows for image enhancement within the magnifier tool for enhanced feature visualization.

Product Code: WS-LIC-1004

MPE Processing Option for SecurView DX Workstations

Allows mammography prior enhancement (MPE) image management software license for use on SecurView DX.

Product Code: WS-LIC-1006

CONNECTIVITY

SecurXchange Archive and Router Solutions

SecurXchange Image Storage and VNA Solutions Archive Systems

SecurXchange Archive solution provides an efficient approach to handling the unique archiving requirements of digital mammography and multi-modality image data for practices that do not have access to a PACS or need a local archiving solution. SecurXchange Archive is specifically designed to support breast imaging modalities offering scalable image archiving capabilities that allow you to add storage space as your practice grows. The SecurXchange Archive includes all Router capabilities.

SecurXchange Archive 5.5 TB PACS
Product Code: SXCH-SYS-6055-3DV

UNIFI® PLATFORM

Unifi Analytics Solution

Unifi Analytics software, as a part of the Unifi Enterprise suite of software solutions, is aimed to deliver actionable insights, drive operational efficiencies, and elevate the quality of patient care. Unifi Analytics provides information an administrator needs to evaluate and optimize Hologic's screening device and technologist performance to run an efficient breast center. This includes reporting such as monthly number of studies conducted, repeat/reject rates over time, rationale for repeat/reject images, average time spent per study, and room utilization. Unifi Analytics also helps reduce unplanned downtime by allowing the administrator to track the potential end-of-life of an x-ray tube through predictive analytics.

Product Code: UA-SUB-SW-007
Unifi Analytics base (when quoting as a service entitlement)

Unifi EQUIP Platform

Part of the Unifi Enterprise platform, the Unifi EQUIP platform facilitates compliance with the FDA's Enhancing Quality Using the Inspection Program (EQUIP) inspection requirements. It creates an efficient compliance process through automated image selection, review scheduling, worklist generation, and report generation, while providing tools to drive a continued focus on image quality improvement so that each location can be ready for inspection day and beyond.

Product Code: UEQ-SUB-002
Breast Biopsy **Portfolio**

BREAST BIOPSY

Affirm® Upright Breast Biopsy Guidance System

Option for Dimensions systems. Intuitive user interface driven by the Dimensions acquisition workstation offers enhanced ease of use. Ergonomic and lightweight design provides quick and easy transition from diagnostic to interventional procedures. Includes one stereotactic biopsy license for one Dimensions system.

Product Codes: STLC-00004
                  Additional License: ASY-04337

Included paddles: ASY-03667 - 5x5cm Biopsy Paddle
                  ASY-03668 - 6x7cm Biopsy Paddle
                  ASY-03669 - 5x5cm Axillary Biopsy Paddle
                  ASY-05205 - 15cm Lateral Arm Biopsy Paddle

Affirm® Lateral Arm Upright Breast Biopsy Guidance System

Attaches to the Affirm Upright Breast Biopsy Guidance System, giving the user the capability to perform 2D or tomosynthesis-guided biopsies using a right or left lateral needle approach.

Product Code: ASY-09880

3D™ Biopsy License

License to activate tomosynthesis-guided biopsy for use with the Affirm Upright Biopsy System. 3D™ biopsy enables fast one-click targeting and lower dose compared to traditional 2D biopsy procedures.

Product Code: ASY-06484

Affirm® Upright Breast Biopsy Accessories

Akrus Chair

The Akrus chair is a versatile and ergonomically designed chair for screening, diagnostic and biopsy imaging. It allows a variety of positioning options including upright and decubitus in all mammography projections, including magnification views.

Product Code: BI-FURN-0002

Paddle Rack

Product Code: ASY-04662

Stand, Lateral Arm Upright Biopsy Accessory

Product Code: ASY-09644

Affirm Storage Bench

Product Code: ASY-05339

BREAST BIOPSY

Affirm® Contrast Biopsy Software

Affirm Contrast Biopsy software allows clinicians to target and acquire tissue samples in lesions identified in contrast enhanced mammography. Contrast enhanced 2D images are utilized for targeting following an IV injection of an iodinated contrast agent.* Affirm Upright Breast Biopsy Guidance System and I-View 2.0 CEM license required.

Product Codes: DIM-LIC-IVIEW-ACB
DIM-LIC-IVIEW-ACB-UP
DIM-LIC-ACB-UP
*Hologic does not sell a contrast agent or an injector. Guidelines for the safe use of power injector and contrast agent must be followed – please refer to manufacturer's respective product specific Indications for Use.

BREAST BIOPSY

Affirm® Prone Breast Biopsy System

Affirm Prone biopsy system is designed to increase automation, provide superior breast biopsy compared to stereotactic biopsy, and offer 360-degree access to the breast to help you identify, target and access lesions for faster, more comfortable biopsies.[1,2] It's also the only system of its kind with 2D and 3D™ imaging – the same proven detector technology of Selenia® Dimensions® – allowing you to easily upgrade from 2D to 3D™ imaging as necessary.

Maximum Comfort padding and Arm-Through accessories provide patient comfort while supporting diverse body types. The Maximum Comfort package is designed to enhance patient comfort. Our ergonomically designed memory foam cushions provide custom, targeted pressure-point support suitable for most body types.

Product Codes: PBX-SYS-AFFIRM-3D, PBX-SYS-AFFIRM-2D

Affirm Prone Biopsy 3D Upgrade

Product Code: PBX-UP-AFFIRM-3D

Biopsy Drapes and Accessories

Affirm Prone Biopsy Draping System:

Contains three parts: drape for the breast platform with an integrated clear plastic section that covers the paddle mount, drape for the biopsy device mount, and a clear cover for the system control panel. The drapes are designed to protect the system from blood or other fluid intrusion during the procedure, while also making it fast and easy to clean the system between patients. Box of 20.

Product Code: ASY-10430

Breast Biopsy Tray:

Sterile biopsy tray includes needles, syringes, PVP swap sticks, gauze, forceps, steri-strips, disposable towels, and scalpel assembly. Box of 10.

Product Code: MME-01782

MultiCare® Stage Draping Kit:

Needle-guidance stage drape and control panel cover. Box of 10.

Product Code: MME-00346

MultiCare Draping Kit:

Needle-guidance stage drape, MultiCare table drape and control panel cover. Box of 10.

Product Code: MME-00347

Fischer Draping Kit:

Siemens/Fischer MammoTest table guidance.

Product Code: MME-00344

Breast Biopsy Tray:

Sterile biopsy tray includes needles, syringes, PVP swap sticks, Lidocaine, gauze, forceps, steri-strips, disposable towels, and scalpel assembly. Box of 10.

Product Code: MME-00345

BREAST BIOPSY

ATEC® Breast Biopsy System

ATEC Sapphire System

All-in-one breast biopsy and excision system using stereotactic, ultrasound, MRI guidance.

Product Code: ATEC SAPPHIRE 100

ATEC Adapters

ATEC Adapter- Hologic Prone System:
Stereotactic adapter for use with Hologic prone systems.

Product Code: ATEC STX-1

ATEC Adapter- Fischer:
Stereotactic adapter for use with Siemens/Fischer MammoTest systems.

Product Code: ATEC STXFISCHER

ATEC Adapter- Universal Upright Systems:
Stereotactic adapter for use with Universal Upright systems.

Product Code: ATEC STX-2

BREAST BIOPSY

Brevera® Breast Biopsy System

Brevera breast biopsy system with CorLumina imaging technology

The Brevera breast biopsy system with CorLumina imaging technology is the world's first and only solution to combine tissue acquisition, real-time imaging verification and advanced post-biopsy handling — all in one, integrated system. It is designed to remove unnecessary steps to streamline the overall biopsy procedure.
Product Code: BREVSYS

Brevera breast biopsy system reusable driver
Product Code: BREVDRV

Brevera breast biopsy system standard stereotactic biopsy needle - Box of 5
Product Code: BREVDISP09

Brevera breast biopsy system adapter
Product Code: BREVADPTR

Brevera breast biopsy system spare tissue filter, 12 chambers
Box of 4
Product Code: BREVTF12

Brevera breast biopsy system spare tissue filter, single chamber
Box of 4
Product Code: BREVTF01

Brevera breast biopsy system stereotactic kit
Product Code: BREVSTXKIT

ATEC Canister - Suction canister with lid for use with the ATEC, Brevera and Eviva breast biopsy devices
Box of 10.
Product Code: ATEC CANISTER

Vacuum Line Assembly
Box of 2.
Product Code: SR6146-02

*DRV and ADPTR are included with the BREVSYS, but are available for addtional purchase

*For use with Brevera handpiece only

BREAST BIOPSY

Celero® Breast Biopsy Devices

Celero Handpiece:
Vacuum-assisted, spring-loaded device using ultrasound guidance. Box of 5.
Product Code: CELERO-12

Celero Introducer:
12g introducer for use with Celero-12 biopsy device. Box of 5.
Product Code: CELERO INTRO-12

BREAST BIOPSY

Eviva® Adapters

Vacuum-guidance breast biopsy device for use under stereotactic x-ray guidance.

Eviva Adapter- Hologic Prone:
Eviva Stereotactic Adapter for use with Hologic Prone systems.
Product Code: EVIVA_STX_KIT_13cm

Eviva Adapter- Hologic Upright:
Eviva Stereotactic Adapter for use with Hologic Affirm Biopsy Guidance System.
Product Code: EVIVA_STX_KIT_AFFIRM

Eviva Adapter- Hologic Legacy Upright:
Eviva Stereotactic Adapter for use with Hologic M-IV and Selenia with StereoLoc II systems.
Product Code: EVIVA_STX_KIT_SLOC

Eviva Adapter- Siemens Upright System:
Eviva Stereotactic Adapter for use with Siemens Optima.
Product Code: EVIVA_STX_KIT_OPTIMA

Eviva Adapter- Siemens/Fischer MammoTest Tables:
Eviva Stereotactic Adapter for use with Siemens/Fischer MammoTest systems.
Product Code: EVIVA_STX_KIT_MTEST

Eviva Adapter- GE Upright Systems:
Eviva Stereotactic Adapter for use with GE Essential/ DS Vertical approach.
Product Code: EVIVA_STX_KIT_GEVER

Eviva Adapter- GE Upright Systems:
Eviva Stereotactic Adapter for use with GE Essential/ DS Lateral with Vertical approach.
Product Code: EVIVA_STX_KIT_GEL-V

Eviva Adapter- GE Upright Systems:
Eviva Stereotactic Adapter for use with GE Essential/ DS Lateral approach.
Product Code: EVIVA_STX_KIT_GELAT

SuperSonic® MACH™ 40 Ultrasound System

Hologic's high-performance SuperSonic MACH 40 Ultrasound System with UltraFast™ Imaging is designed to help increase efficiency and diagnostic accuracy in your practice.

- Fully optimized general and breast imaging application
- Fully optimized breast, thyroid, abdominal, OB/GYN, genitourinary, musculoskeletal, small parts, vascular and pediatric clinical applications
- 3D™ breast compatible
- L18-5 linear 50mm transducer
- Angio PL.U.S™ imaging (L18-5, L10-2, C6-1X and C9-2X capable) for breast, MSK, thyroid, abdominal and GYN applications
- Suite of liver disease assessment tools
- UltraFast Doppler
- Needle PL.U.S™
- ShearWave™ PL.U.S Elastography
- Integrated gel warmer
- DICOM connectivity package
- USB 3 pedal configurable foot switch
- Wi-Fi capability
- Automated Protocols

SuperSonic® MACH™ 40 Ultrasound System

Transducers and Accessories

LH20-6 Hockey Stick Linear 27mm Transducer

MSK, Vascular, Breast and Pediatric applications. 192 elements. Ultra-broadband from 6 to 20 MHz.

Product Code: SSIP9104

LV16-5 3D Linear (40mm by 40mm) Transducer

Breast Application. 192 elements. Broadband from 5 to 16 MHz.

Product Code: SSIP95108

L10-2 Linear 38mm Transducer

Vascular, thyroid, breast, abdominal, MSK and pediatric applications. 192 elements. Broadband from 2 to 10 MHz.

Product Code: SSIP95103

C6-1X Single Crystal Curvilinear 60mm Transducer

Abdominal, OB/GYN, vascular, thyroid and pediatric applications. 192 elements. Broadband from 1 to 6 MHz.

Product Code: SSIP95101

C9-2X Single Crystal Curvilinear 50mm Transducer

Abdominal, OB/GYN, vascular, thyroid and pediatric applications. 192 elements. Broadband from 2 to 9 MHz.

Product Code: SSIP95105

E12-3 Endocavity 138° Transducer

Endorectal or endovaginal applications. 192 elements. Broadband from 3 to 12 MHz.

Product Code: SSIP95102

MC12-3 Micro-convex 18mm Transducer

Vascular and pediatric applications. 192 elements. Broadband from 3 to 12 MHz.

Product Code: SSIP95106

P5-1X Single Crystal Phased Array 20mm Transducer

TCD application. 96 elements. Broadband from 1 to 5 MHz.

Product Code: SSIP95107

High-end Barcode Reader

Handheld ergonomic scanner to read barcodes. Factory programmed to be operational with SuperSonic MACH systems.

Product Code: SSIP03813

Integrated Black and White Thermal Printer

Model: Sony UP-D898DC. A6 format.

Product Code: SSIP95200

BioZorb® 3D Bioabsorbable Marker

The BioZorb is a 3D™ implantable marker that consists of a unique spiral, bioabsorbable framework embedded with six permanent, titanium clips designed to precisely mark your surgical excision site. The BioZorb provides 3D™ targeting for radiation therapy and comes in a range of sizes from 2-5cm including Lower Profile (LP).

2cm x 2cm F0202
2cm x 3cm F0203
3cm x 3cm F0303
3cm x 4cm F0304
4cm x 4cm F0404
4cm x 5cm F0405

Low Profile 2cm x 2cm x 1cm F0221
Low Profile 2cm x 3cm x 1cm F0231
Low Profile 3cm x 3cm x 1cm F0331

Sizer Set- Sterilization Case

Tray and six individual sizes.

Product Code: F0101

LOCalizer™ Wire-Free Localization System

The LOCalizer wire-free guidance system is designed to mark and guide to non-palpable breast lesions using a miniature radiofrequency identification (RFID) Tag. Each Tag has a unique identification number that is displayed on the reader and can be placed in the breast any time prior to or on the day of surgery.

LOCalizer Handheld Reader

The LOCalizer Handheld Reader locates and reads RFID Tags which have been implanted using the Tag Applicator. The LOCalizer Reader displays the distance between the Tag and the Probe under use. The LOCalizer Reader is a portable, battery-operated system and is supplied non-sterile. The sterile LOCalizer Instrument Cover (Product HB120) will be provided to drape the reader when used in a sterile environment.

Product Code: 09-0001

Surgical Probe

The Surgical Probe is a single-use, sterile, disposable probe used to guide the surgeon to the Tag during the procedure.

Product Code: 09-0006

BREAST SURGERY

LOCalizer™ Wire-Free Localization System

Standard Needle & Tag Applicator

The Standard Tag Applicator is visible under ultrasound guidance and consists of a plastic molded handle and a beveled 12 GA introducer needle with locking plunger. Needles are provided in approximately 5, 7 or 10cm lengths and include 1cm depth reference marks.

Product Codes: Standard Needle 10cm- 09-0007
Standard Needle 7cm- 09-0028
Standard Needle 5cm- 09-0029

S Needle & Tag Applicator

The S needle tag applicator has a slim radiolucent hub with a light proximal end and a beveled 12 GA introducer needle. The S needle is visible under x-ray guidance and is available in 5, 7 or 10cm lengths with 1cm depth reference marks.

Product Code: S Needle 10cm- 09-0007S
S Needle 7cm- 09-0028S
S Needle 5cm- 09-0029S

Faxitron® Specimen Radiography Systems

Faxitron® Core System

The Faxitron Core specimen radiography system is designed to provide high-resolution imaging within seconds, eliminating delays for core sample verifications.

Product Code: COREVISION5X10

Faxitron® Trident® HD Mid System

When it comes to stereotactic breast biopsies or breast conserving surgeries, the Faxitron Trident HD Mid Specimen Radiography System continues the power of Hologic's proven detector technology to generate images for rapid sample verification right in the procedure room or operating room.

Product Code: TRI-SYS-MID
Faxitron® Trident® HD Full System

The Faxitron Trident HD Full is the ideal specimen radiography system for busy ORs where space is at a premium. Whether performing breast-conserving surgeries or stereotactic breast biopsies, this solution taps the power of Hologic's proven detector technology to generate images for rapid sample verification right in the OR or procedure room.

Trident HD System with Localizer Bundle

Horizon® DXA Systems

Hologic, the pioneer in x-ray-based bone densitometry, takes advanced health assessment to a new level with the Horizon DXA system. This multi-faceted system can help clinicians assess bone health and body composition, and cardiovascular risk-critical elements that will help keep life in motion. The Horizon DXA Platform covers five system models: A, W, C, Wi and Ci.

Order through the Horizon Bundles.

Horizon A DXA System
Product Code: HORIZON-A

Horizon C DXA System
Product Code: HORIZON-C

Horizon Ci DXA System
Product Code: HORIZON-Ci

Horizon W DXA System
Product Code: HORIZON-W

Horizon Wi DXA System
Product Code: HORIZON-Wi

Body Composition Software
Product Code: WB/PHANTOM

TBS iNsight™ Software

Hologic, the pioneer in x-ray-based bone densitometry, has partnered with Medimaps™ Group to offer a software application that works in conjunction with all Horizon DXA system models to analyze the structure of bone matrix, thus assisting the health-care practitioner to assess the quantity and quality of bone microarchitecture in a patient and better predicting fracture risk.

Product Codes: TBS-INSIGHT-LIC-PHM-V3.1, TBS-INSIGHT-V3.1
