

STYLE GUIDE FOR DESIGNERS USING SITE STUDIO

For a consistent user experience, please utilize one of our standardized heroes featuring the breadcrumb, display title and link to support. Hero helpers are available using 50/50 or full width styles and can host stills and a variety of video options including autoplay.

Supporting documentation and educational information, including direction to our MedEd portal, should be treated this way. Additional content pages can be navigated to by adding up to two more tabs or creating a separate in-page navigation.

This is our helper for hosting a product's logo and related microsites.

STYLE GUIDE FOR DESIGNERS USING SITE STUDIO

Clinical Evidence

Clinically proven to deliver a more comfortable mammogram.

More Comfortable
93% of women surveyed found their mammogram more comfortable with the SmartCurve™ system.

Greater Accuracy
Genius™ 3D Mammography™ exam has been proven to detect 20–65% more invasive cancers than 2D alone.

Reduced callbacks
Reduces callbacks by up to 40% compared to 2D mammography alone.
